

Hello! We are looking forward to another term of supporting our Nursery pupils to play, discover and learn.

We will be exploring the changing seasons and encouraging children to notice and comment on changes that they can see as we enjoy being outdoors this winter. Children should come to Nursery appropriately dressed for Winter and this will form some of our learning as we encourage the children to have a go at dressing themselves for outdoor play and learning. Nursery staff are hoping for snow as this will link perfectly to our learning!

Class Newsletter - Nursery

Maths:

Children will explore some learning in Maths using Numberblocks characters from CBeebies.

We will continue with counting forwards up to 10, or beyond if your child is ready for this, and will be focusing on the value of numbers to 10.

We will explore shapes in our environment and encourage children to be shape detectives, asking them to identify and name a range of shapes indoors and outdoors.

Spring Term 1 2022

Other Areas of Learning:

This term, we will have a focus on planting and growing. We have some planters that require some TLC and we are sure that the children will enjoy getting their hands dirty and begin getting them ready for Spring.

Children will be following their own interests every day and staff will continue to develop these interests to support learning on an individual basis. Observational evidence will be sent to you later this term.

Literacy:

We will explore a range of traditional tales this term and will be encouraging children to retell stories and to use new vocabulary that they learn.

Children will be offered a range of mark making opportunities and we will continue with 'Squiggle as you Wiggle' every morning to support these skills.
